

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims**

1. (original) A method for providing data transport services, comprising the steps of:
  - a. providing a publicly-owned, high-capacity communications network;
  - b. allowing connection of the communications network to service providers and paying customers; and
  - c. charging tolls for use of the communications network by the service providers and customers, without regard to the type or content of the data transmitted.
2. (original) A method according to claim 1, wherein the network comprises high-capacity fiber optic communication lines and end-user connections.
3. (original) A method according to claim 1, further comprising the step of interconnecting the high-capacity communications network to other communications networks.
4. (original) A method according to claim 1, wherein the service providers are selected from the group consisting of cable television companies, telecommunications companies, and internet service providers.
5. (original) A method according to claim 1, wherein the step of providing a publicly-owned, high-capacity communications network comprises constructing a fiber optic network within a geographic region controlled by a governmental entity.
6. (original) A method according to claim 5, wherein the governmental entity is selected from the group consisting of a city, a county, a special district, a state, and a nation.

7. (original) A method according to claim 5, wherein the fiber optic network is constructed using public funds.
8. (original) A method according to claim 1, wherein the fees collected from users of the network and service providers are used to meet costs associated with the network.

19. (new) A method for providing data transport services, comprising the steps of:
  - a. constructing a high-capacity communications network as a component of publicly-owned infrastructure;

- b. allowing connection of the communications network to service providers and paying customers; and
  - c. charging tolls for use of the communications network by the service providers and customers, without regard to the type or content of the data transmitted.
20. (new) A method according to claim 19, wherein the network comprises high-capacity fiber optic communication lines and end-user connections.
21. (new) A method according to claim 19, further comprising the step of interconnecting the high-capacity communications network to other communications networks.
22. (new) A method according to claim 19, wherein the service providers are selected from the group consisting of cable television companies, telecommunications companies, and internet service providers.
23. (new) A method according to claim 19, wherein the step of constructing the high-capacity communications network as a component of public infrastructure comprises constructing a fiber optic network within a geographic region governed by a governmental organization selected from the group consisting of a city government, a county government, a special district, a state government, and a national government.
24. (new) A method according to claim 23, wherein the fiber optic network is constructed using public funds.
25. (new) A method according to claim 19, wherein the fees collected from users of the network and service providers are used to meet costs associated with the network.
